

# THANK YOU for signing up for an Energizing Indiana Home Energy Assessment!

## When your assessment is completed, \$25 will be donated to LIFE Designs.

### *What is included in your Home Energy Assessment?*

Energy Advisors will guide you step by step through the process to produce long-term, cost-effective energy savings by analyzing your energy use, recommending appropriate efficiency measures and installing several low-cost energy-saving measures. Advisors will also assess the heating, ventilation and air-conditioning (HVAC) systems in your home to determine if they are operating efficiently. We also may inspect your home's air duct sealing, insulation levels and more to evaluate your home's energy consumption and heating and cooling efficiency.

### *The Home Energy Assessment may include energy saving measures such as:*

- Replacing traditional incandescent bulbs with efficient CFLs (limit nine)
- Installing low-flow faucet aerators (limit three)
- Installing low-flow shower heads (limit two)
- Water heater insulation wrap (on electric water heaters only)

Once your home's energy assessment is complete, you will receive a comprehensive report detailing what can be done to start saving energy and make your home more comfortable. Many times a Residential Home Energy Assessment reveals that only simple and relatively low-cost improvements are necessary to achieve significant energy savings.

Weatherization services are available for income-qualified homeowners.

Energizing Indiana programs are funded by utility rates and there are no separate fees to participate.

### *What happens after you sign-up for a home energy assessment?*

After your sign-up form is returned to LIFE Designs, you will soon receive a call from Energizing Indiana to schedule your Home Energy Assessment.

Any questions, contact Arthur J. McCoy with Energizing Indiana at 317-601-1221, [arthur.mccoy@goodcents.com](mailto:arthur.mccoy@goodcents.com) or fax: 317-664-8205.
