

September 25<sup>th</sup> 2020- Covid – 19 Update – LIFEDesigns Director of Nursing Renee Clevenger

Coronavirus (which causes Covid- 19) continues to impact the daily lives of all including those that we serve.

We are constantly reviewing the current information and recommendations regarding the pandemic and the risk it poses to clients and staff. Preventative measures remain a key factor in decreasing the amount of exposure and preventing a domino effect. Keeping clients and staff safe and healthy remains our primary goal.

We continue to practice the following safeguards:

Employee health screening process, health screening for NON- employees, Enhanced cleaning and hand hygiene. Complying with social distancing and face mask and/or face covering.

Additionally, protective measures are added as the need arises based on specific situations involving staff and clients.

I am happy to report that no clients of LIFEDesigns have tested positive for Covid - 19. This is a direct result of the continued efforts of our dedicated staff and the protective measure that are in place.
